

SYEDA SIMRA FATIMA

Computer Science Engineer

Software Development | Programming | Cybersecurity | Technology

+91 87923 68656 | syedasimrafatima12@gmail.com | github.com/Simrafatima

PROFILE

- Computer Science Engineer with practical exposure across cybersecurity, software development, programming, artificial intelligence, IoT, and technology-focused projects.
- Strongest hands-on experience in cybersecurity and security testing, supported by software development, technical projects, and practical problem solving.
- Open to Master's programs and technical opportunities across cybersecurity, software development, programming, and broader technology.

EDUCATION

B.Tech in Computer Science & Engineering | Visvesvaraya Technological University (VTU), Belagavi, Karnataka
2026 | CGPA 8.91/10

EXPERIENCE

Movidu Technology Private Limited | *Business Associate & Cybersecurity Intern*
Feb 1, 2025 - May 10, 2025 | In collaboration with OneStop.ai

- Business development, startup and entrepreneurship concepts, professional communication, project activities, and business-oriented problem solving.
- Mobile and web application security testing, ethical hacking, vulnerability assessment, security tools, and controlled hands-on cybersecurity exercises.

SELECTED PROJECTS

Brain Hemorrhage Detection & Prediction using CNN | *Python, TensorFlow, Keras, OpenCV, Gradio*

CNN-based CT-image analysis system with 91% reported model accuracy, rapid result presentation, and structured preliminary report generation.

Secure Authentication System | *Python, Flask*

Application focused on authentication workflows, secure user access, and practical web-security concepts.

Bafa Fitness | *React, Vite, JavaScript*

Responsive fitness website with a clean, user-focused interface and modern frontend structure.

Women Safety Application | *Application Development*

Safety-focused mobile application designed around emergency assistance and quick access to safety-oriented features.

IoT Weather Forecasting & Smart Water Tank Automation | *IoT, Sensors, Monitoring, Automation*

IoT projects covering environmental monitoring, weather-related forecasting, and automated water-level management to reduce overflow and manual intervention.

TECHNICAL SKILLS

- Programming & Development: Python, JavaScript, React, Vite, Flask, Programming Fundamentals.
- Cybersecurity: Burp Suite, Nmap, Wireshark, Metasploit, Nikto, CyberChef, Autopsy; mobile and web VAPT; TryHackMe practice; DVWA; Genymotion.
- AI & Technology: TensorFlow, Keras, OpenCV, Gradio, CNN, IoT, Automation, Problem Solving.

CERTIFICATIONS & TRAINING

- CyberSmart - 21-day online cybersecurity course.
- GTTC - Cybersecurity & Ethical Hacking.
- CySeck International School - 21-day Finishing School Program.
- Cybersecurity Certification.
